The paid reveal

What the shopper sees in the 1.3 seconds after the poll first returns paid. One sequence, read top to bottom: the confirmation bar completes, the step badge becomes a check, the mark lands, the facts arrive. No colour, no confetti.

- 0 msThe last confirmation lands; the bar completes
- 300 msThe badge's 3 becomes a check, drawn in
- 700 msThe mark lands and sheds one ring
- 1.3 sSettled — details and the button have risen in

Easing: ease-out for fades and the check; a soft, overshoot-free curve (cubic-bezier .2 .7 .2 1) for the mark.

Reduced motion: every element appears in its final state at once; nothing moves. The sequence plays once, when the poll first returns paid, never on reload.
